300 million people come from the future because of an imminent global disaster. All refugees must follow two rules: they can't have any contact with their families in the present, and they are not allowed to talk about the future. The arrival of the refugees takes Cruz's family back, same as the rest of the population. The story is going to focus on them, Samuel, Emma and little Ani. And everything will change when Alex, one of the refugees, becomes a part of their lives. He has a mission that has to be accomplished with all of its consequences.
